To Whom it May Concern,

I am a Land Surveyor, and I use GPS equipment both in professional and recreational capacities. The proposed network that Light Squared is proposing poses a grave danger to the general public by endangering the existing GPS signals. Light Squared should not be allowed to broadcast on signals that can endanger the existing GPS signals.

The use of high precision GPS has become an important part of protecting the public's rights as property owners, and the design, construction, and maintenance of America's public works systems.

Please feel free to contact me if you have any questions or comments.

Thank you, and have a good day.

Sincerely,
Jimmy L. Cleveland, RLS, PLS
